

Product: Boiling pan - electric

Producer: Gastro-Haal, s.r.o.

Type: **KE-200** 

Country of origin: SK

## **Purpose**

Electric boiling pan is a basic unit in largescale kitchens as a school dining hall, restaurants, hospitals, all types of canteens, including of military, etc. Boiling pan is designed for cooking of soups, sauces, meat, pasta, dairy meals without any danger of burning, for stewing of fish, vegetable, mushrooms, etc. and for heating of frozen meals and semi-finished food.

The food is cooked by steam which is generated in double shell (duplicator).

- volume of cooking tank 200 litres
- manual opening lid to an angle approx.80°
- square cooking tank (indirect heating)
- thermal and protective insulation of duplicator
- probes for measuring the water level in the duplicator
- automatic water filling
- tap for cold water
- safety fitting/valve with manometer
- outlet valve 2"
- outlet tube to valve 2" for bigger pieces of food
- power supply: electricity
- fast heating of cooking tank, low consumption of energy and low operating costs
- three-stage power regulation of heating elements with 4-position switch
- quiet, safe, and noiseless operation
- heating elements in a special steel box
- double insulation on cables and wires (silicone protection)
- self-supporting massive and solid construction
- top plate, inner and outer shell of tank, and lid made of AISI 304
- inner bottom of cooking tank made of high-quality stainless steel AISI 304
- rounded edges without danger corners and protrusions
- bottom cover of boiling pan
- adjustable feet
- simple operation

### Standard accessories of boiling pan:

- sieve in front of outlet valve for catching of food

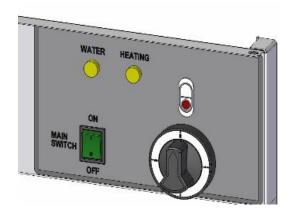

#### **Available accessories** for sales price:

- square steamer for dumplings
- food Vaseline for daily maintenance of outlet valve

# **Front panel**

- classic analogy
- 3 position of cooking (1 = ON, 2 = SAVING mode, 3 = FULL mode)

## What is the duplicator?

Duplicator is closed steam tank designed for indirect heating of boiling pan cooking tank. The warm is supplied from heating elements to steam, which is produced between duplicator and cooking tank – this is double jacket.

Duplicator is equipped with a safety fitting that protects the equipment from excessive overpressure, ensures that is vented before cooking and the re-aerated at the end of cooking. The safety fitting includes the manometer which controls the pressure in duplicator. The boiling pan includes the pressure switch.

Duplicator therefore ensures the smooth heating, and the food does not burn.

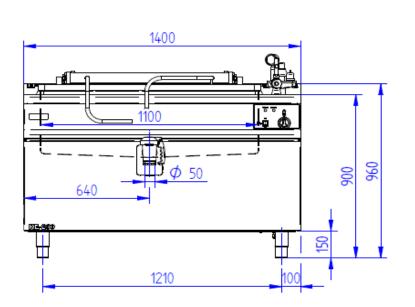

# **Technical descriptions**

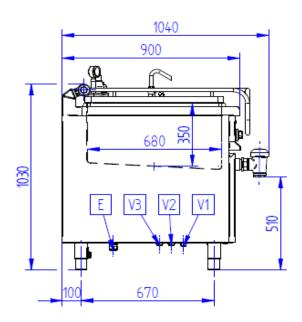

Line	900	
Туре	KE-200	
Description electric boiling pa		
Front panel	classic analogy	
External dimensions (mm)	1400x900x900mm	
Volume of cooking tank (I)	2001	
Duplicator	square	
Duplicator volume (in intermediate jacket) (I)	901	
Water volume in duplicator (after level sensor)	46,21	
Water capacity in duplicator (I) 27,5		
Automatic filling of water into duplicator	yes	
Nominal pressure of duplicator (bar)	0,4	
Heating		
Heating elements in special steel box	yes	
Max.input (kW)	24 kW	
Nominal voltage	3x400/230 V + PEN 50 Hz TN-S	
Nominal current	34 A	
Circuit breaker	40 A	
Three-stage power regulation of heating elements with 4-position switch	yes	
Water heating time in a brewing pot 20-90°C (min.)	61 min	
Water, valve, protection		
Cold water connection (")	3/4"	
Max. water pressure (bar)	6 bar	
Outlet valve (")	2"	
Outlet tube to valve (")	2"	
Index of protection	IP 41	
Construction, savings, safety		
Pressed top plate for water outfall	no	
Double insulation on cables and wires (silicone protection)	yes	
Rounded edges without danger corners and protrusions	yes	
Thermal and protective insulation of duplicator	yes	
Weight (kg)	185 kg	
Covering of bottom	yes	
Options for extra fees according of valid Price list		
Cooking temperature setting (thermostatic control) "T" from 30 to	yes (extra fee)	
Cooking tank material AISI	AISI 304 standard / AISI 316 (extra fee, whole tank)	
Index of protection IP45	yes (extra fee)	
Vaseline for outlet valve	yes (extra fee)	
Cooking baskets	yes (extra fee)	
Steamers	yes (extra fee)	
Dumplings maker	yes (extra fee)	

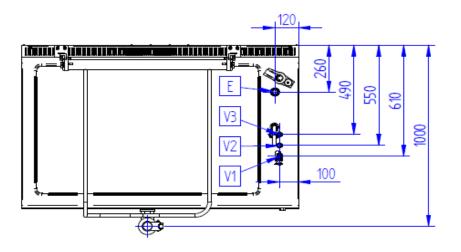

Hard water softener	yes (extra fee)
Sieve in front of outlet valve	free of charge
Adjustable feet	yes
